REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 9 the prior arts fail to teach or fairly suggest a route – optimization method and system, wherein the method and system comprises:

receiving a binding update includes a care-of address of a mobile node;
creating a binding to the care-of address responsive to receipt of the binding update;

sending a RSVP PATH message responsive to receipt of the binding update, wherein the RSVP PATH explicitly binds a data path of a packet flow to the mobile node; and

receiving a RSVP RESV message responsive to the path message, in combination with other limitations as specified in claims 1 and 9.

Regarding claims 16 and 34, the prior arts fail to teach or fairly suggest a route – optimization method and system, wherein the method and system comprises:

sending a binding update in response to a binding request, wherein the binding update includes a care-of address of a mobile node, a binding to the care-of address is created responsive to receipt of the binding update, a RSVP PATH message that explicitly binds a data path of a packet flow to the mobile node is sent responsive to receipt of the binding update, and a RSVP RESV message is sent responsive to the RSVP PATH message, in combination with other limitations as specified in claims 16 and 34.

Regarding claims 25 and 38, the prior arts fail to teach or fairly suggest a route – optimization method and system, wherein the method and system comprises:

sending a binding update in response to the binding request, wherein the binding update includes a care-of address of a mobile node;

receiving a RSVP PATH message sent in response to receipt of the binding update, wherein the RSVP PATH message explicitly binds a data path of a packet flow to the mobile node; and

sending a RSVP RESV message responsive to the RSVP PATH message, in combination with other limitations as specified in claims 25 and 38.

Conclusion

3. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Thien Tran whose telephone number is (571) 272-3156. The examiner can normally be reached on Monday-Friday from 8:30AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy Vu, can be reached on (571) 272-3155. Any inquiry of a general nature of relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.

4. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
